Projects

Food Express—An Food Delivery Web Application

- Built a full-stack MERN app for browsing, ordering, and managing food items.
- Implemented user authentication, protected routes, and dynamic cart management.
- Tech Stack: React.js, Node.js, Express.js, MongoDB, Tailwind CSS
- GitHub Repo: <https://github.com/codesrishav/FoodExpress>

Weather Forecast Web Application

- Real-time weather updates using OpenWeatherMap API.
- Responsive UI with Tailwind CSS and asynchronous JavaScript data handling.
- Tech Stack: React.js, Tailwind CSS, HTML, JavaScript
- GitHub Repo: <https://github.com/codesrishav/WeatherForecast>
- Project Live link : <https://weather-forecast-eight-gules.vercel.app/>

Certifications

Web Development Certification – GEMS

Object-Oriented Data Structures in C++ – Coursera

Achievements

- Participated in Smart India Hackathon (SIH) 2024 as a finalist representing Narula Institute of Technology.
- Secured 82% in NPTEL Soft Computing course conducted by IIT Dhanbad, awarded Elite tag with Silver medal and ranked in the top 5% of participants.

Hobby

Playing guitar and singing, especially during leisure time, as a way to relax and refresh the mind.

Enjoy listening to music, which inspires creativity and enhances focus.
